

TABLE 7
Pesticide-Associated Skin Disease
Among Field Workers
1982 – 1997

Year	Definite or Probable	Possible
1982	32	105
1983	28	77
1984	45	99
1985	154	146
1986	148	56
1987	51	139
1988	62	186
1989	7	77
1990	8	98
1991	2	64
1992	16	94
1993	1	51
1994	5	37
1995	74	74
1996	12	55
1997	8	45

* Evaluation of field worker dermatitis became more conservative in 1987, following a 1986 study that demonstrated the difficulty of collecting reliable information.
